

The VorTech™ MP20 Propeller Pump

THE MP20 FROM ECOTECH MARINE has revolutionized small reef aquarium propeller pumps. Ideally suited for aquariums smaller than 70 gallons, the MP20 produces unmatched broad yet gentle flow while placing the motor outside the tank—preserving the beauty of your aquarium and enhancing the health of your tank's ecosystem.

With all the electrical components outside the aquarium and a variety of easy-to-program modes, the VorTech is the safest, most versatile pump on the market. And, if your tank needs to grow, the MP20 can be upgraded to the MP40w—providing you wireless communication between your pumps and even more functionality.

OPERATIONAL MODES

- **Feed Mode:** Slows down your pump for 10 minutes to allow you to feed your aquarium.
- **Constant Speed Mode:** The pump runs at a constant speed you set based on your aquarium's specific needs.
- **Reef Crest Mode:** Simulate the high-energy conditions of a natural reef crest environment.
- **Lagoon Mode:** Simulate a calmer, lagoon reef environment.
- **Optional Battery Backup:** Keeps the circulation going during power failure for up to 30 hours.

MP20 SPECIFICATIONS

Appropriate Tank Size: 20 to 70 gallons

Dimensions:

- **Wet Side:** 3" diameter by 2.25" long
- **Dry Side:** 3" diameter by 2.25" long

Flow: 500 to 2000 gallons per hour

Power Consumption: 6 to 18 watts

Aquarium Wall Thickness: 3/16" to 3/4"

General Operating Temperature:
20-30° C (68-86° F)

Maximum Motor Temperature:
50-60° C (122-140° F)

Clearance Needed Behind Aquarium: 3"

Upgradeable to the MP40w by buying a special upgrade kit
